DATTA MEGHE INSTITUTE OF MEDICAL SCIENCES

(DEEMED TO BE UNIVERSITY)

SAWANGI (MEGHE), WARDHA

DEPARTMENT OF FACULTY OF SCIENCE & TECHNOLOGY

COURSE CURRICULUM FOR

BACHELOR OF SCIENCE IN ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

B.SC. AI & DS

UNDER

SCHOOL OF ALLIED SCIENCES

W.E.F. 2021-22

Contents

- 1. Preamble
- **2.** About The Course
- 3. Aim /Goals
- 4. Objectives
- 5. Eligibility Criteria
- 6. Intake Capacity
- 7. Teaching Learning Methodology
- 8. Medium of Instruction
- 9. Attendance
- 10. Course Duration
- 11. Educational ProgramA) Subject Codes and Titles
 - B) Distribution of Teaching Hours and Credit Conversion
 - C) Distribution for Summative Assessment
 - D) Details of Syllabus
 - E) Program Outcomes for BSC AI & DS
- 12. Scheme of Examination
- 13. Books Recommended (For Every Semester)

Addition, Deletion and Modification of contents are highlighted with different colour codes

- 1. Green for addition,
- 2. Yellow for modification,
- 3. Red for deletion ,

4<mark>. Blue</mark> for Contents relevant to Gender, Environment and Sustainability, Human Values, Health Determinants, Right to Health Issues, Emerging demographic changes and Professional Ethics in the curriculum

1. PREAMBLE

Datta Meghe Institute of Higher Education and Research undertakes important measures to enhance academic standards and quality in education including innovation and improvements in curriculum, teaching-learning process, examination and evaluation systems, besides governance and other matters. The university formulates various regulations and guidelines from time to time to improve the education system and maintain minimum standards and quality.

The grading system is considered to be better than the conventional marks system and hence it has been followed in the top institutions in India and abroad. So it is desirable to introduce uniform grading system. This will facilitate student mobility across institutions within and across countries and also enable potential employers to assess the performance of students.

2. ABOUT THE COURSE

The program revolves around the field of Artificial Intelligence and Data Science which is essentially about storing processing securing and managing information. Students learn how to analyze computer problems and system performance manage large amounts of data provide quality customer service and maintain a safe secure network system. This programme is useful to learn how to actively monitor and defend the network and furthermore make fundamental security approach and methods.

3. AIM

This course, Bachelor of Science in Artificial Intelligence and Data Science, is designed and introduced by University to bridge the gap and produce employable graduate in Science & technology which will enable the industry to grow and the graduates to become successful in the field of Artificial Intelligence and Data science.

Goals

- To enable a learner to pursue any area of knowledge domain depending upon his / her interest.
- To widen the horizon of learner's intellectual insight.
- Rigidity of present system does not allow pursuit of areas of interest as well as widening the educational horizon of the learner, and
- Provision of choice is an essential condition for broad-based learner's profile across areas of knowledge.

4. OBJECTIVES:

The objectives of the program are to -

- 1. Impart knowledge of computer and programming logic environment with AI & DS
- 2. Impart Knowledge of Artificial Intelligence & Data Science based applications in different business sectors
- 3. To equip students with the technical knowledge required for an AI & DS professional to handle multi-tasking and multi-programming situations and to assess and develop ML based Applications
- 4. Evaluate and compare cutting edge technologies and techniques and its application in the solution of common AI & DS based problems.
- 5. Develop the capacity to continuously learn and adapt to the changing technologies and organizational environments.

5. ELIGIBILITY CRITERIA:

The aspiring candidate should have passed the Higher Secondary (10+2) or equivalent examination recognized by any Indian University or a duly constituted Board.

6. INTAKE CAPACITY-

20 candidates per year

7. TEACHING LEARNING METHODOLOGY -

- The modality of teaching for teaching learning modules will be in the form of didactic
- Lectures, self directed learning, seminars presentation Microteaching etc.

8. MEDIUM OF INSTRUCTION:

• English shall be the medium of instruction for all the subjects of study and for examination of the course.

9. ATTENDANCE:

A candidate has to secure minimum 80% attendance in overall with at least-

- **1.**75% attendance in theoretical
- 2.80% in Skills training (practical) for qualifying to appear for the final examination

10. COURSE DURATION-

• The B.Sc. AI & DS Course is of 3 years duration, divided into six Semesters (2 semesters each year) including dissertation/Project in sixth semester.

Skill based outcomes and monitorable indicators for B.Sc. AI & DS:

On completion of the B.Sc. (Artificial Intelligence & Data Science) students are able to:

- 1. Serve as the Data Scientist.
- 2. Serve as the Data Analyst, Data Engineer.
- 3. Work as the Data Mining Engineer and Research Analyst.
- 4. Serve as the Business Intelligence Analyst, Business Analyst and Analytics Manager.
- 5. Can work as Artificial Intelligence Programmers or the Software Engineers with the sound knowledge of practical and theoretical concepts for developing software.
- 6. Work as the System Engineers and System integrators.

11. EDUCATIONAL PROGRAM

A) Distribution of Course duration

First Semester– Foundation Course

| Sl. No. | Course Titles |
|---------------|---------------------------------------|
| BSDS101 | Discrete Mathematics |
| BSDS102 | Digital Computer Fundamentals |
| BSDS103 | Statistics & Probability |
| BSDS104 | Principles of Data Science |
| BSDS105 | Python Programming |
| BSDS106(PR-1) | Data Analysis Using Advance Excel Lab |
| BSDS107(PR-2) | Python Programming Lab |
| BSDS108 | Communication skills/ English |

Second Semester

| Sl. No. | Course Titles |
|----------------|--|
| BSDS201 | Digital Electronics |
| BSDS202 | Operating Systems |
| BSDS203 | Introduction to AI |
| BSDS204 | Data Structure |
| BSDS205 | Probability Models (Discrete and Continuous Data) |
| BSDS206 (PR-1) | Data Structures Lab |
| BSDS207(PR-2) | R Programming and Statistical Modelling Lab |
| BSDS208 | Environmental Science |

Third Semester

| Sl. No. | Course Titles |
|----------------|---|
| BSDS301 | Principles of Machine Learning |
| BSDS302 | Applied Linear Algebra |
| BSDS303 | Optimization Techniques |
| BSDS304 | Object Oriented Programming Using Java |
| BSDS305 | Database Management Systems |
| BSDS306 (PR-1) | Database Management Systems Lab |
| BSDS307(PR-2) | Java Programming Lab |
| SECC | Computer Vision & Image Processing (MOOC) |

Fourth Semester

| Sl. No. | Course Titles |
|----------------|--|
| BSDS401 | Data Analytics |
| BSDS402 | Artificial Intelligence & Knowledge Presentation |
| BSDS403 | Statistical Inference |
| BSDS404 | Web Technologies |
| BSDS405 | Software Engineering |
| BSDS406 (PR-1) | Artificial Intelligence Lab |
| BSDS407(PR-2) | Web Technologies Lab |
| SECC | IEGCE – 2 |

Fifth Semester

| Sl. No. | Course Titles |
|---------------|--|
| BSDS501 | Big Data Programming |
| BSDS502 | Artificial Neural Networks and Deep Learning |
| BSDS503 | Technologies in Data Science |
| BSDS504 | Block-chain with AI |
| | Internet of Things (IoT) |
| BSDS505 | Data Warehousing & Mining |
| BSDS506(PR-1) | Big Data Programming Lab |
| BSDS507(PR-2) | Deep Learning Models Lab |
| SECC | IEGCE – 3 |

Sixth Semester

| Sl. No. | Course Titles |
|---------|-----------------------|
| BSDS601 | AI in Cloud Computing |
| BSDS602 | Web Analytics |
| BSDS603 | Project & Seminar |
| BSDS604 | Data Security |
| | Cyber Security |
| BSDS605 | Internship |

| Sr. No | Semester | Course Code | Course Name | Total Credits |
|--------|----------|-------------|--|---------------|
| 1 | Ш | - | MTC – M365 – Microsoft | 2 |
| 2 | 11 | - | MTA – Python | 2 |
| 3 | IV | - | Administer Oracle Cloud Database | 2 |
| 4 | IV | - | MTA – Java | 2 |
| 5 | V | - | Microsoft Azure AI and Data Certifications | 2 |
| 6 | V | - | Big Data 2017 - Implementation Essentials | 2 |

INDUSTRY ENABLED GLOBAL CERTIFICATION ELECTIVES (IEGCE)

Summary of the Program: B.Sc. (AI & DS)

| Sr. No | Particulars | Total Courses | Total Credits | Total Marks |
|-----------|---|------------------|------------------|----------------|
| 1 | Core Courses | 26 | 101 | 2600 |
| 2 | Ability Enhancement Compulsory Course (AECC) | 2 | 4 | 200 |
| 3 | Skill Enhancement Compulsory Course (SEC) | 10 | 10 | 1000 |
| 4 | Industry Enabled Global Certification Electives (1 Certification in II, IV, V Semester) | 3 | 9 | 300 |
| 5 | Generic Elective Course (GE) | 2 | 8 | 200 |
| 6 | Open University Elective Courses (OE) | 1 | 4 | 100 |
| 7 | Project & Seminar | 1 | 2 | 100 |
| 8 | Internship | 1 | 3 | 100 |
| | Total | 47 | 144 | 4700 |

B) Distribution of Hours and Credits

| Course | Course | Lectures | Tutorial | Pra/Activit | Credits |
|---------------|--|----------|-------------|-----------------------|---------|
| Code | Name | (L) | (T) | y (P) | |
| BSDS101 | Discrete Mathematics | 3 | 1 | 0 | 4 |
| BSDS102 | Digital Computer Fundamentals | 3 | 0 | 2 | 4 |
| BSDS103 | Statistics & Probability | 3 | 1 | 0 | 4 |
| BSDS104 | Principles of Data Science | 3 | 1 | 0 | 4 |
| BSDS105 | Python Programming | 3 | 1 | 0 | 4 |
| BSDS106(PR-1) | Data Analysis Using Advance Excel Lab | 0 | 1 | 2 | 2 |
| BSDS107(PR-2) | Python Programming Lab | 0 | 1 | 2 | 2 |
| BSDS108 | Communication skills/ English | 2 | 0 | 0 | 2 |
| | Total | 17 | 6 | 6 | 26 |

D) <u>Curriculum Design</u>

The Bachelor of Science in AI & DS Program is organized into six teaching Semesters Minimum 180 working days will be available for teaching, learning and evaluation (TLE) in each year of study and 90 working days shall be available for each semester.

One Credit will be awarded to 1 contact hour of teaching and learning for Theory and one Credit will be awarded to 2 contact hours of teaching and learning for Practical and Studentship. For elective courses 2 contact hours shall be awarded one credit.

E) Program Outcomes for BSC AI & DS

PO1) Computational knowledge: Acquire knowledge of Computing Fundamentals, Basic Mathematics, Computing Specialization and Domain Knowledge of proper computing models from defined problems.

PO2) Problem analysis: Identify, formulate review research literate and analyze complex engineering problems reading substantiated conclusions using first principles mathematics, computing science and relevant domains.

PO3) Design/development of solutions: Ability to design system s/w or process as per global needs and specifications.

PO4) Conduct investigations of complex computing problems: Use research-based knowledge and research methods including design of experiments, analysis & interpretation of data & synthesis of information to provide valid conclusions.

PO5) Modern Tool Usage: Ability to demonstrate skills to use modern s/w & h/w tools to analyze problems.

PO6) Professional Ethics: Apply ethical principles and commit to professional ethics and cyber regulations.

PO7) Life-Long Learning: Ability to develop confidence for self-education and life-long learning in the global context of technological change.

PO8) Project management and finance: Ability to demonstrate knowledge & understanding of the engineering and management principles and apply them as a member & as a leader in a global team to manage multidisciplinary projects.

Details of Syllabus BSc. AI & DS: SEMESTER I

| Course: Discrete Mathematics Cou | | | | | | | Course Code:] | BSDS10 | 1 |

| L | Т | Р | C | CIA-1 (Class participation) | CIA-2 (Assignment 1 & 2) | CIA-3 (Mid Test 1 & | 2) Theory | T/P | |

Max. Time, End Semester Exam (Theory) -3Hrs.

3 1

| Cou | rse Objectives |
|-----|---|
| 1 | To understand the propositional calculus. |
| 2 | To understand and apply normal forms. |
| 3 | To understand predicate calculus and inference. |
| 4 | To understand the concept of quantifier. |
| 5 | To understand the concept of Graph theory |

| | | Course Content | |
|-------------|---------------|---|-------|
| Unit No. | Module No. | Content | Hours |
| 1. | | Propositional Calculus Connectives, Negation, conjunction, Disjunction, statement formulas Truth tables, conditional and Bi-conditional, Tautologies and Contradiction, Equivalence of Proposition, duality law, Tautologies implications. | 12 |
| 2 | | Types of Normal Forms Disjunctive normal forms, connective normal forms Principal disjunctive normal form, Principal conjunctive normal form. | 12 |
| 3 | | Predicate Calculus The theory of Inference for statement Calculus, Validity using truth tables, Rules of inference | 12 |

| | Consistency of premises and indirect method of Proof | |
|---|---|----|
| 4 | Quantifier • Introduction, • Quantifier, Predicate formulas, • Free and Bound variables, Theory of predicate calculus. | 12 |
| 5 | Graph Theory • Basic concepts • Types of graphs • Representation of graph in memory • Euler path and circuits • Hamiltonian Path and circuits • Trees • Basic concepts • Labeled trees • Undirected trees | 12 |
| | Total No. of Hrs | 60 |

| Course Outcome |
|--|
| Students should able to |
| CO1:Understand the implementation of propositional calculus. |
| CO2: execute the concept of normal forms and its evaluation. |
| CO3: solve the predicate calculus, inference and its applications for societal needs |
| CO4: examine the concept of quantifier, predicate formulas. |
| CO5: develop graphs and trees using graph theory |

- **1** To introduce the basic and scope of statistics
- 2 To obtain the measures of central tendency
- **3** To introduce probability and its types
- **4** To focus on the random variable, mathematical expectation, and different types of distributions.
- **5** To understand the basic concepts in mathematical expectations.

| Course Content | | | | | | | | |
|----------------|--|--|--------|--|--|--|--|--|
| Unit No. | Module No. | Content | Hours | | | | | |
| 1. | Introduction to Statistics | Definitions of Statistics, Importance & Scope of Statistics, Limitation & Distrust of Statistics, Statistical Data Collection, Presentation and Classification and its tools, Frequency Distributions. | 12 | | | | | |
| 2 | Descriptive Measures | Measures of Central Tendency, Measures of Dispersion, Moments, Skewness and Kurtosis, Correlation and Regression Introduction, Coefficients and their Properties. | 12 | | | | | |
| 3 | Probability | Introduction, Types of Probabilities, Mathematical Tools, Mathematical Laws of Probabilities, Bayes Theorem on Probability. | 12 | | | | | |
| 4 | Random Variables and Distribution Functions | Discrete and Continuous Random Variable, Probability Mass Function, Probability Density Function, Discrete and Continuous Distribution Function. | 12 | | | | | |
| 5 | Mathematical Expectation and Variance | Introduction, Theorems of Expectation, Co-variance, Expectation & Variance of a Linear Combination of Random Variables, Moment Generating Function, Characteristics Function, Cumulant Generating Function. | 12 | | | | | |
| | | Total No. of Hrs | s 60 | | | | | |

| Course Outcome |
|---|
| Students should able to |
| CO1:Explain the basic and scope of statistics |
| CO2: Examine the measures of central tendency |
| CO3: Implement probability and its types |
| CO4: Solve problems on random variable, mathematical expectation, and different types of distributions as per societal applications |
| CO5: Formulate the basic concepts in mathematical expectations |

 Course Outcome

 Students should able to

 CO1: Understand the fundamental concepts of data science.

 CO2: Describe the data analysis techniques for applications handling large data and Demonstrate

the data science process for global needs

CO3: Implement concept of machine learning used in the data science process.

CO4: Visualize and present the inference using various tools.

CO5: Construct the ethics surrounding privacy and data sharing.

| Co | ourse Objectives |
|----|--|
| 1 | Learn Basic of Excel |
| 2 | Learn Basics and advance functions for calculation |
| 3 | Learn how to organize raw data using Excel |
| 4 | Learn Statistical Analysis using Excel |
| 5 | Learn Advance Excel for data mining, descriptive and predictive analysis |

List of Programs

1. Getting started with excel: Create a blank Workbook, Save Workbook, Modify an excel Spreadsheet, enter text values in excel, Merge and center text, apply Style, create basic formulas.

2. Basic data manipulation techniques: sorting, filtering, conditional formatting.

3. Using Excel Execute the statistical functions: Sum, mean, median, mode, Min, Max.

4. Perform Conditional Operations by Using Function.

5. Securing the Excel Document (Protect Cells and Workbook)

6. Solve Problem using Lookup Function.

7. The file Product.xlsx contains monthly sales for six products. Use the INDEX function to compute the sales of Product 2 in March. Use the INDEX function to compute total sales during April.

8. Use Text function to manipulate given Data.

9. Analyze Data using COUNTIF, COUNTIFS, COUNT, COUNTA, and COUNTBLANK Functions.

10. Use SUMIF, AVERAGEIF, SUMIFS, and AVERAGEIFS Functions to Evaluate Given dataset.

11. Pivot Table Generation for Given Data using Excel.

12. Using Solver to Determine the Optimal Product Mix

13. Using Excel Execute the statistical functions: quartiles, range, inter quartile range.

14. Using Excel Functions Calculate the standard deviation, variance, co-variance of given Data.

15. Perform the hypothetical testing in Excel.

16. Perform ANOVA one way classification, t test using Excel

17. Time series: forecasting Method of least squares, moving average method. Inference and discussion of results.

Course Outcome

Students should able to

CO1:Perform Basic of Excel.

CO2: Implement Basics and advance functions for calculation.

CO3: Demonstrate how to organize raw data using Excel.

CO4: Design and implement Statistical Analysis using Excel.

CO5: Develop Advance Excel for data mining, descriptive and predictive analysis for societal applications

- **1** To write, test, and debug simple Python programs.
- **2** To implement Python programs with conditionals and loops.
- **3** Use functions for structuring Python programs.
- **4** Represent compound data using Python lists, tuples, and dictionaries.
- **5** Read and write data from/to files in Python.

List of Programs

- 1. Write a program to demonstrate basic data type in python.
- 2. Write a program to implement various operators in python.
- 3. Write a program to implement various conditional statements in python.
- 4. Write a program to implement various looping statements in python.
- 5. Write a program to implement various string operations.
- 6. Write a program to demonstrate list & related functions in python.
- 7. Write a program to demonstrate tuple & related functions in python.
- 8. Write a program to demonstrate Dictionary & related functions in python.
- 9. Write a program to read and write from a file, and copy a file
- 10. Write a program to implement numpy and pandas packages.
- 11. Write a program to Import Excel File and csv File and perform operation in it

12. Write a Program to Create Different Types of Chart by importing CSV file.

13. Write a Program to Import the data , Clean Data, Train Data.

Course Outcome Students should able to

CO1:Understand and develop Computational Thinking concepts for societal applications

CO2:Describe python programs that appropriately utilize built-in functions and control flow Statements

CO3: design and represent compound data using Python lists- tuples- dictionaries

CO4: develop input/output with files in Python.

Course Objectives

1 To identify key elements and principles of communication.

2 To demonstrate understanding of the communication process using listening and reading.

3 To describe their own writing skills strengths and growth areas.

4 To identify letter writing skills.

5 To demonstrate ability to prepare and present a short oral presentation.

| | | Course Content | |
|-------------|--|--|-------|
| Unit No. | Module No. | Content | Hours |
| 1. | Introduction and Theory of Communica tion: | Nature, function & scope; The 7 Cs of communication, The communication Process: classification, components and models of communication; Problems in communication (Filters), Channels of communication: Formal v/s Informal, Upward, Downward, Horizontal, Grapevine; Barriers to communication. | 6 |
| 2 | Verbal and Non-verbal communicat ion: | Listening, Kinesics, Paralanguage, Proxemics, Essentials of effective verbal communication: Voice modulation, Tone, Pitch, Knowledge and self confidence, Meetings: Types; purpose. Group Discussions: Do's and Don'ts; Committees: Types, Advantages and disadvantages, effectiveness. Public Speaking: Preparation, Attire, Posture and Delivery techniques | 6 |
| 3 | Principles of Communica tion: | Definition, Purpose, Process, Types, Barriers to Communication, Listening, Feedback, Nonverbal Communication Written Communication: Composing Business Letters/email Request, Enquiry, Placing Order, Instruction, Action, Complaint, Adjustment, Sales, Reference, Good News & Bad News, Acknowledgement, Circulars, Notices, Memos, Agenda and Minutes, Resume/CV, Facsimiles (Fax)], Preparing Notes, Punctuation, Using simple words, Proof Reading, Vocabulary, Basic Grammar, Comprehension, précis, preparing user manual, Report Writing: Report | 6 |

| | | Planning, Types of Reports, Developing an outline, Nature of Headings, Ordering of Points, Logical Sequencing, Graphs, Charts, Executive Summary, List of Illustration, Annual Report. | |
|---|-----------------------------------|---|----|
| 4 | Communica tion and Culture: | Intercultural sensitivities, Business etiquette when dealing with people from different nationalities. Understanding cultural diversity and Business etiquette with foreign clients Impact of modern Technology on Business Communication: the paperless office, use of modern devices Methods of effective audiovisual communication, EMPLOYMENT COMMUNICATION: Writing CVs and Application Letter, Group discussions, interview, types of interview, candidates preparation, Interviewers preparation; Impact of Technological Advancement on Business Communication; Communication networks, Intranet, Internet, teleconferencing, videoconferencing | 6 |
| 5 | Group Communica tion | Meetings: need, importance and planning of Meetings, drafting of notice, agenda, minutes and resolutions of Meeting, writing memorandum, press release, press conference, Business etiquettes, telephonic and table etiquettes. Presentation Skills: What is a presentation: elements of presentation, designing a presentation, advanced visual support for business presentation, types of visual aid, appearance and posture, practicing delivery of presentation. Corporate Communication: Definition, scope, importance and components of corporate communication, professional communicator responsibilities, corporate communication and Public Relation, role of social media in communication. | 6 |
| | | Total No. of Hrs | 30 |
| | • | | |

Course Outcome

Students should able to

CO1: describe ability to write error free by optimum use of correct business communication

CO2: distinguish between various hierarchy of organizational communication and communication barriers

CO3: implement principles of critical thinking problem solving with technical proficiency in business communication for societal applications

CO4: Develop effective interpersonal communication skills that maximize team dynamics

CO5: Develop and understanding of communication process in an organizational setup

- **1** To understand the concepts of digital electronics.
- 2 To understand the basic working of different logic gates and laws of Boolean algebra, De Morgan theorem, NOR & NAND logic for simplification of circuits.
- **3** To understand the basic working of multiplexer, de-multiplexer, half adder, full adder.
- 4 To understand the basic working of sequential circuits and flips flop.
- **5** To understand the basic working of shift registers and counters.

| | | Course Content | |
|-------------|---------------|--|-------|
| Unit No. | Module No. | Content | Hours |
| No. | No. | Introduction to Digital and Analog system: Overview of Analog System Overview of Digital System Logic Systems Representation -Positive and negative Waveform Representation of Analog and Digital system Detail of Digital Signal: 2.1Advantages of Digital system Disadvantages Difference between Analog and Digital System Binary Digit Boolean Algebra: Rules and laws of Boolean algebra Simplification examples based on rules of Boolean algebra De-morgan's Theorems Boolean Expressions and Truth Tables | 12 |
| | | Min-term and Maxterms Principal of Duality | |
| 2 | | Basic of Logic Gates: Logical Operators, Logic Gates-Basic Gates NOT, AND, OR Gates Other gates and Universal Gate | 12 |

| | NAND Gate | |
|---|--|----|
| | NOR Gate | |
| | • XOR Gate | |
| | • EX-CLUSIVE OR Gate | |
| | • EX-CLUSIVE NOR Gate | |
| | • Implementation of Other Gates using Universal Gates | |
| | 3. Introduction to Number Systems: | |
| | • Types-Decimal, Binary, Octal, Hexadecimal | |
| | • Conversion from Binary number to BCD and vice- | |
| | versa | |
| | Binary arithmetic operations; Addition and | |
| | Subtraction | |
| | Representation of Negative Numbers | |
| | • 1's complement and 2's complement and their | |
| | examples | |
| | 1. Introduction to combinational Circuits | |
| | Design procedure of Combinational circuit | |
| | • Multiplexer | |
| | • De-Multiplexer. | |
| | • Encoder | |
| | • Difference between Decoder and Multiplexer | |
| 3 | 2. Arithmetic circuit: Adders | 12 |
| | • Difference between Serial and Parallel Adder | |
| | Half-Adder | |
| | • Full-Adder | |
| | Difference between Half and Full Adder | |
| | Concept of Subtractor | |
| | Concept of Subfractor | |
| | 1. Introduction to Sequential circuits. | |
| | • Overview of Sequential circuit | |
| | • Classification of Sequential circuit-Synchronous and | |
| | Asynchronous and their difference | |
| | • Introduction of Latches | |
| 4 | 2. Types of Flip-flop: | 12 |
| | • RS, T, D, JK; Master-Salve JK | |
| | • I Flip-flop | |
| | • D Flip-liop | |
| | JK Flip-flop Mater-Slave IK Elip-flop | |
| | 3. Difference between Combinational and sequential circuits. | |
| | 1. Introduction to shift registers: | |
| | Basic shift register | |
| _ | • Types of shift registers- Serial in to serial out Serial in | 10 |
| 5 | to parallel out | 12 |
| | • Parallel in to Serial out Parallel in to Parallel out | |
| | 2. Introduction to counters: | |

| Overview of counters Types of counters Difference between synchronous and asynchronous counter Application of Counter | |

1 To provide a practical exposure to data structures and its applications.

List of Programs

- 1. Implement creation, insertion, deletion, update in an array.
- 2. Implement concatenation of arrays, find the length of the arrays.
- 3. Implementation of Single Linked List performing the following operations
- (i)Creation (ii) insertion (iii) deletion (iv) traversal
- 4. Array implementation of Stacks.
- 5. Array Implementation of queues.
- 6. Implementation of Stack using Linked list.
- 7. Implementation of Queue using Linked list.
- 8. Implementation of linear search.
- 9. Implementation of Binary Search.
- 10. Implementation of Insertion sorting.
- 11. Implementation of selection sorting.
- 12. Implementation of merge sort.
- 13. Implementation of Sorting Algorithm Separate chaining and Open Addressing Hashing

Technique

- 14. Implementation of Binary Search Tree
- a. Create a binary search tree.
- b. Traverse the above binary search tree recursively in pre-order, post-order and in- order
- c. Count the number of nodes in the binary search tree. LIST
- 15. Write Python programs to create a tree and implement the following graph traversal algorithms a.

Depth first search. b. Breadth first search.

| Course Outcome | | | | | | |

1 To enable students to understand and develop programs in R environment.

List of Programs

- 1. Write a program to demonstrate basic data type in python.
- 2. Write a program to implement various operators in python.
- 3. Write a program to implement various conditional statements in python.
- 4. Write a program to implement various looping statements in python.
- 5. Write a program to implement various string operations.
- 6. Write a program to demonstrate list & related functions in python.
- 7. Write a program to demonstrate tuple & related functions in python.
- 8. Write a program to demonstrate Dictionary & related functions in python.
- 9. Write a program to read and write from a file, and copy a file
- 10. Write a program to implement numpy and pandas packages.
- 11. Apply scaling mechanism by considering the employee data (based on the given data set).
- 12. Demonstrate the normalization process and implement the same with customer data of bank.
- 13. Apply at least 3 sampling techniques to get the best data from the population.
- 14. Demonstrate the missing value imputations.
- 15. Demonstrate the usage of outlier detection.
- 16. Apply various data summarization techniques in student data.
- 17. Demonstrate the techniques to handle the imbalanced data sets.

- **1** To understand multidisciplinary nature of environmental studies.
- 2 To understand Renewable and non-renewable resources.
- **3** To understand characteristic features, structure and function of the ecosystem.
- 4 To understand biodiversity and its conservation.
- **5** To understand environmental pollution and social issues.

| | | Course Content | |
|-------------|---------------|--|-------|
| Unit No. | Module No. | Content | Hours |
| 1. | | THE MULTIDISCIPLINARY NATURE OF ENVIRONMENTAL STUDIES: 1.1 Basic definitions related to environment; 1.2 Scope, environmental science and environmental engineering; 1.3 Uses of environmental degradation, 1.4 Atmospheric composition and associated spheres, 1.5 habitat and climate; 1.6 Objective, goals and principles involved in environmental education, 1.7 Environmental awareness, 1.8 Environmental ethics, 1.9 Environmental organization and their involvement | 6 |
| 2 | | NATURAL RESOURCES: 1.1 Renewable and non-renewable resources; 1.1.1 forest resources, over-exploitation, and deforestation / afforestation; 1.1.2 water resources, impact of over-utilization of surface and ground water, floods, drought, conflicts over water, dams 1.1.3 mineral resources: dereliction of mines, environmental effects of extracting and using mineral resources; 1.1.4 Food resources, modern agriculture and its impact, problem associated with fertilizer and pesticide, water logging, salinity; 1.2 energy resources, renewable, non- renewable energy sources, | 6 |

| | 1.2.1 solar energy, 1.2.2 wind energy, 1.2.3 hydro energy, 1.2.4 biomass energy, 1.2.5 geothermal energy, 1.2.6 nuclear energy and its associated hazards; 1.3 land as a resource, 1.3.1 land degradation, 1.3.2 man induced landslides, 1.3.3 soil erosion and desertification | |
|---|---|---|
| 3 | ECOSYSTEMS:3.1 Concept of an ecosystem,3.1.1 structure and function of an ecosystem,3.1.2 producers, consumers and decomposers,3.1.4 energy flow in the ecosystem,3.2 ecological succession,3.2.1 food chains,3.2.2 food webs and ecological pyramids;3.3 characteristic features, structure and function of thefollowing ecosystem –3.3.1 forest ecosystem,3.3.2 grassland ecosystem3.3.3 desert ecosystem3.3.4 aquatic ecosystems. | 6 |
| 4 | BIODIVERSITY AND ITS CONSERVATION: 4.1 Bio-geographical classification of India; 4.1.1 biodiversity at global, national and local levels, 4.1.2 India as a mega-diversity nation, 4.1.3 hot-spots of biodiversity; 4.1.4 value of biodiversity-consumptive use, productive use, social, ethical aesthetic and option values; 4.1.5 threats to biodiversity; 4.1.6 conservation of biodiversity: in- situ and ex-situ conservation of biodiversity. | 6 |
| 5 | ENVIRONMENTAL POLLUTION AND SOCIAL ISSUES: 5.1 Pollution 5.1.1 Causes, effects and control measures of air pollution, 5.1.2 water pollution, 5.1.3 soil pollution, 5.1.4 marine pollution, 5.1.5 noise pollution, 5.1.6 thermal pollution; 5.2 solid waste management, | 6 |

| 5.2.1 e-waste management; 5.3 disaster management –floods, earthquake, cyclone and landslides. Water conservation, rain water harvesting, watershed management; 5.4 climate change, 5.5 global warming, 5.6 acid rain, 5.7 ozone layer depletion; 5.8 Environmental Protection Act, | |
|---|----|
| 5.8.1 Air (Prevention and Control of Pollution)Act, 5.8.2 Water (Prevention and Control of Pollution) Act, Wildlife Protection Act, Forest Conservation Act. | |

- **1** To understand basic concepts of java and programming in java.
- 2 To understand object oriented concept with inheritance and constructors.
- **3** To understand and implement interfaces and exception handling.
- 4 To understand java applet.
- **5** To understand swing programming.

| | | Course Content | |
|-------------|---------------|--|-------|
| Unit No. | Module No. | Content | Hours |
| 1. | | Object oriented and Java Basics: Need for OOP paradigm, summary of OOP concepts, History of Java, Java buzzwords, JVM –The heart of Java , Java's Magic Bytecode. Data types, variables, scope and life time of variables, arrays, operators, expressions, control statements, type conversion and casting, simple java program, concepts of classes, objects, constructors, methods, access control, this keyword, using final with variables, garbage collection. | 12 |
| 2 | | Overloading methods and constructors : Recursion, nested and inner classes, exploring string class. Extending Classes and Inheritance, Use and Benefits of Inheritance in OOP, Types of Inheritance in Java, Inheriting Data members and Methods, Role of Constructors in inheritance, Overriding Super Class Methods, Use of "super", Polymorphism in inheritance. | 12 |
| 3 | | Interfaces: differences between classes and interfaces, Packages & Interfaces, defining an interface, implementing interface, applying interfaces, variables in interface and extending interfaces. Exception handling: Concepts of exception handling, benefits of exception handling, Termination or resumptive models, exception hierarchy, usage of try, catch, throw, throws and finally, built in exceptions, creating own exception sub classes. String handling, Exploring java.util | 12 |

| | Java applets: | |
|---|--|----|
| | Life cycle of an applet – Adding images to an applet – Adding sound | |
| | to an applet. Passing parameters to an applet. | |
| | • Event Handling: Events, Event sources, Event classes, Event | |
| 4 | Listeners, Delegation event model, handling mouse and | 12 |
| | keyboard events, Adapter classes. AWT classes, window | |
| | fundamentals, working with frame window, creating frame | |
| | window in applet, working with, graphics, colors, font, AWI | |
| | controls. | |
| | Swing: | |
| 5 | Introduction, limitations of AWT, components & containers, exploring | |
| | swing-Japplet, Jframe and Jcomponent, Icons and Labels, text fields, | |
| | buttons – The Jbutton class, Check boxes, Radio buttons, Combo | 12 |
| | boxes, Tabbed Panes, Scroll Panes, Trees, and Tables. Handling | |
| | menus, graphics, layout manager – layout manager types – border, | |
| | grid, flow, card and grid bag. | |
| | Total No. of Hrs | 60 |

| Course Outcome | | | |
|-------------------------|---|--|--|
| Students should able to | | | |
| CO1 | Understand basic concepts of java and programming in java as per societal needs | | |
| CO2 | Understand object oriented concept with inheritance and constructors. | | |
| CO3 | Understand and implement interfaces and exception handling. | | |
| CO4 | Understand programming in java applet. | | |
| CO5 | Understand swing programming. | | |

| Recommended Res | sources | |

| 1 | To understand Database Management System Concepts. |
|---|--|
|---|--|

- 2 To understand Data Model and Types of Data Model.
- **3** To understand RDBMS properties and its implementations.
- **4** To understand Relational Algebra and its Operations.
- **5** To understand the concept of normalization and its forms.

| | | Course Content | |
|-------------|---------------|--|-------|
| Unit No. | Module No. | Content | Hours |
| 1. | | Introduction & DBMS Architecture Introduction- Data- Database- Database management system- Characteristics of the database approach -Role of Database administrators- Role of Database Designers-End Users-Advantages and limitations of Using a DBMS and When not to use a DBMS. DBMS Architecture – Data Models – Categories of Data models- Schemas-Instance and Database states- DBMS Architecture and Data Independence – The Three schema architecture- Data Independence – DBMS language and interface-Classifications of Database Management Systems. | 9 |
| 2 | | Data Modelling Using Entity-Relationship Model Using high level conceptual Data models for Database Design- Example Database Applications. Entity types- Entity Sets- Attributes and Keys. Relationships- Relationship types- Roles and Structural constraints. Weak Entity Types and Drawing E- R Diagrams. | 9 |
| 3 | | Database Design Functional dependencies and Normalization for Relational Databases - Normalization on concepts first, second, third normal forms-BCNF. | 9 |
| 4 | | Transaction Processing Concepts and Concurrency Control Transaction and System concepts – Desirable properties of Transactions – Schedules and | 9 |

| | Recoverability. Lock-Based Protocols – Locks-Granting of Locks and Two- phase locking protocol. | |
|---|---|----|
| 5 | Database Connectivity and NoSQLIntroduction and implementation of database connectivity -Introduction to NoSQL – Advantages and disadvantages-Types | 9 |
| | Total No. of Hrs | 45 |

| Course Out | come |
|-------------|--|
| Students sh | ould able to |
| CO1 | Understand Database Management System Concepts for societal applications |
| CO2 | Understand Data Model and Types of Data Model. |
| CO3 | Understand the concept of normalization and its forms. |
| CO4 | Understand Transaction and System Concepts |
| CO5 | Understand database connectivity |

| Teaching Scheme (Hrs/Week) | | | | Continuous In- | In- Course Assessment (CIA) (30%) | | | End Semester Examination (70%) | |
|----------------------------------|--|---|---|---|--|----------------------|----------------------------|--------------------------------------|-----|
| L | Т | Р | С | CIA-1 (Lab participation/ Attendance) | CIA-2 (Written Practical Logbook) | CIA-3 (Viva/Oral) | Written Perfor mance | Viva / Oral | |
| 0 | 0 | 4 | 2 | 10 | 10 | 10 | 50 | 20 | 100 |
| Ma | Max. Time, End Semester Exam (Practical) – 3Hrs. | | | | | | | | |

1 To learn and understand Database Programming Paradigms.

2 To learn and understand NoSQL.

3 To learn Relational Database (Open source) such as MongoDB/ Oracle/MySQL.

List of Programs

1. Write a program to demonstrate basic data type in python.

2. Write a program to implement various operators in python.

- 3. Write a program to implement various conditional statements in python.
- 4. Write a program to implement various looping statements in python.
- 5. Write a program to implement various string operations.
- 6. Write a program to demonstrate list & related functions in python.
- 7. Write a program to demonstrate tuple & related functions in python.
- 8. Write a program to demonstrate Dictionary & related functions in python.
- 9. Write a program to read and write from a file, and copy a file
- 10. Write a program to implement numpy and pandas packages.
- 11. Apply scaling mechanism by considering the employee data (based on the given data set).
- 12. Demonstrate the normalization process and implement the same with customer data of bank.
- 13. Apply at least 3 sampling techniques to get the best data from the population.
- 14. Demonstrate the missing value imputations.
- 15. Demonstrate the usage of outlier detection.
- 16. Apply various data summarization techniques in student data.
- 17. Demonstrate the techniques to handle the imbalanced data sets.

| Course Outcome | | | | | | | |
|-------------------------|---|--|--|--|--|--|--|
| Students should able to | | | | | | | |
| CO1 | Understanding of Database Programming Languages. | | | | | | |
| CO2 | Master the basics of database languages and construct queries using SQL, PLSQL, NoSQL for societal applications | | | | | | |
| CO3 | Understand how analytics and big data affect various functions now and in the future. | | | | | | |

| Teaching Scheme (Hrs/Week) | | | | Continuous In- | • Course Assess (30%) | End Semester Examination (70%) | | Total | |
|----------------------------------|--|---|---|---|--|--------------------------------------|----------------------------|-------------------|-----|
| L | Т | Р | С | CIA-1 (Lab participation/ Attendance) | CIA-2 (Written Practical Logbook) | CIA-3 (Viva/Oral) | Written Perfor mance | Viva / Oral | |
| 0 | 0 | 4 | 2 | 10 | 10 | 10 | 50 | 20 | 100 |
| Ma | Max. Time, End Semester Exam (Practical) – 3Hrs. | | | | | | | | |

1 To enable students to understand and develop difference between C++ and Java.

- 2 To develop and testing java application as a practical course work.
- **3** To develop the concept of UI design in java using SWING.

List of Programs

1. To implement different entry controlled and exit controlled looping statements

- 2. To Implement nesting of switch statement
- 3. To Implement single and multi-dimensional arrays
- 4. To implement constructor overloading and method overloading
- 5. To implement static keyword
- 6. To Implement multilevel inheritance
- 7. To implement super and this keyword
- 8. To implement abstract and final keyword
- 9. To implement the concept packages
- 10. To implement the concept of interfaces
- 11. To Implement exception handling and custom exceptions
- 12. To implement Byte oriented stream classes
- 13. To implement character-oriented stream classes
- 14. To Implement multithreading
- 15. To implement generic classes
- 16. To implement mouse and keyboard events
- 17. To implement different layout managers

18. To design a customer registration form using advanced swing components

| Course Outcome | | | | | | | |
|----------------|--|--|--|--|--|--|--|
| Students sh | Students should able to | | | | | | |
| <u>CO1</u> | Demonstrate their ability to understand the concepts of Object-oriented programming and will model the real-world applications using Object Oriented programming concepts. | | | | | | |
| CO2 | Apply the concept of Multithreading in concurrent programming. | | | | | | |
| CO3 | design GUI applications using SWING and Event Handling for societal applications | | | | | | |

BSc. AI & DS: SEMESTER IV

Course: Data Analytics

Course Code: BSDS 401

| Teaching Scheme (Hrs/Week) | | | g k) | Continuous In- | Continuous In- Course Assessment (CIA) (30%) | | | End Semester Examination (70%) | |
|----------------------------------|--|---|---------|--------------------------------|---|---------------------------|--------|--------------------------------------|-----|

| Ma | Max. Time, End Semester Exam (Theory) -3Hrs. | | | | | | | | |

| Cou | irse Objectives |
|-----|---|
| 1 | To provide knowledge of data analysis. |
| 2 | To understand the sources of analytics. |
| 3 | To learn feature selection. |
| 4 | To explore data visualization with different tools. |
| 5 | To explore data visualization with tableau. |

I

| Course Content | | | | | |
|----------------|---|--|-------|--|--|
| Unit No. | Module No. | Content | Hours | | |
| 1. | Introducti on to Data Analytics | Knowledge Discovery Process, Data, Types of Data, Types of Analytics: Exploratory data analysis, Confirmatory analytics, descriptive analytics, Prescriptive analytics and Predictive Analytics, Data Mining v/s Data Analysis v/s Data Analytics. Data Analytics Life Cycle. Tools for Data Analytics: R, Python, Google Colab, Kaggle, Big Data Analytics - MapReduce, Hadoop, Hive, Sharding, NoSQL Databases. | 12 | | |
| 2 | Sources of Analytics | Data warehousing Architecture- Data Sources- ETL process- Data warehouse Best practices, gathering and selecting the data- data cleansing and preparation- data mining best practices- Types of charts- tips for data visualization. | 12 | | |
| 3 | Feature Selection | Feature Selection- Feature Scaling and Normalization techniques- Confusion Matrix- Area Under Curve- Receiver operating characteristic Curve- Statistical methods for Evaluation- Correlation and Regression. | 12 | | |
| 4 | Introducti on to Data Visualizat ion | Definition – Methodology – Seven Stages of Data Visualization – Data Visualization Tools. Visualizing Data: Mapping Data onto Aesthetics – Visualizing Amounts - Visualizing Distributions: Histograms and Density Plots – Visualizing Propositions: – Visualizing Associations: Among Two or More Quantitative Variables – Visualizing Time Series and Other Functions of an Independent Variable – Trends – Visualizing Geospatial Data. | 12 | | |
| 5 | Visualizat | Tableau Software Ecosystem, Toolbar Icons, Data Window and | 12 | | |

| | Total No. of Hrs | 60 |
|----------|---|----|
| Tableau | Records & Measures, Cross-tabulation, Heat Maps, Tree maps, Bar Chart, Line Chart, Pie Chart, Scatter Plot, Histogram, Boxplot | |
| ion with | Aggregation Connect to Data Sorting Data Measure Names Number of | |

| Course Outcome | | | | | | |
|-------------------------|--|--|--|--|--|--|
| Students should able to | | | | | | |
| CO1: | Understand data analysis. | | | | | |
| CO2: | Understand the sources of data analytics. | | | | | |
| CO3: | Learn feature selection. | | | | | |
| CO4: | Explore data visualization with different tools. | | | | | |
| CO5: | Develop data visualization with tableau. | | | | | |

| Ma | Max. Time, End Semester Exam (Theory) -3Hrs. | | | | | | | | |

| 1 | To achieve basic perspective of AI and its foundations |
|---|--|
| 2 | To become familiar with basic principles of AI towards problem solving, inference, perception, |
| | knowledge representation and reasoning |
| 3 | To investigate applications of AI techniques in intelligent agents, expert systems and other machine |
| | learning models |
| 4 | To acquire the knowledge of real world knowledge representation |
| - | |

5 To understand the concept of robotics

| Course Content | | | | |
|----------------|---|--|-------|--|
| Unit No. | Module No. | Content | Hours | |
| 1. | Introduction | Introduction to Artificial Intelligence, Foundations of Artificial Intelligence, History of Artificial Intelligence, State of the Art, Risks and Benefits of AI, Intelligent Agents, Agents and Environments, Good Behaviour: Concept of Rationality, Nature of Environments, Structure of Agents. | 12 | |
| 2 | Logic and InferencesPropositional Logic, First Order Logic, Soundness and Completeness, Forward and Backward chaining | | | |
| 3 | Heuristic Search | Problem-Solving Agents, Search Algorithms, Uninformed Search Strategies, Informed (Heuristic) Search Strategies, Heuristic Functions, Search in Complex Environments, Local Search and Optimization Problems. | 12 | |
| 4 | Structured Knowledge Representations | The Schema, Semantic Net, Scripts Goals, Plans and MOPS, Inheritance in taxonomies, Description Logics, Conceptual Graphs | 12 | |
| 5 | Robotics | Robot Introduction- Seven Criteria of Defining a Robot, Robot Controllers-Major Components, Robot Vocabularies- Robotics Middleware Basics. | 12 | |
| | | Total No. of Hrs | 60 | |

| Students sho | ould able to |
|--------------|--|
| CO1 | Understand various searching techniques, constraint satisfaction problem and game playing |
| | techniques. |
| CO2 | Apply basic principles of AI in solutions that require problem solving, inference, perception, |
| | knowledge representation and reasoning |
| CO3 | Analyse and design a real world problem for implementation and understand the dynamic |
| | behaviour of a system |
| CO4 | Acquire the knowledge of real world knowledge representation |
| CO5 | Understand the concept of robotics |

- **1** To introduce the concepts of estimation and testing of hypotheses.
- 2 To understand the concept of parametric tests for large and small samples.
- **3** To provide knowledge about non-parametric tests and its applications.
- 4 To enable students to understand the concept of estimation, test of hypothesis.
- **5** To apply appropriate estimation technique and test of hypothesis.

| | Course Content | | | | | |
|-------------|----------------------------|--|-------|--|--|--|
| Unit No. | Module No. | Content | Hours | | | |
| 1. | Introduction | Concept of Population- Sample- Sample Space- Parameter and Statistic- Parameter Space Sampling distribution of a statistic- Standard error. Derivation of Standard Error of sample mean variance (without derivation)- proportion and difference between variances. Concept of Order Statistic. | 12 | | | |
| 2 | Theory of Estimation | Point Estimation, Concept of Estimator and Estimate- properties of Point estimator – Unbiasedness- Consistency- Efficiency- relative efficiency- Minimum variance unbiased estimators- Sufficiency- Cramer Rao Inequality (Statement only)- Rao Blackwell Theorem (Statement only)- Neyman Factorization Theorem (Statement only). Methods of Estimation: Maximum likelihood- Least Squares and Minimum Variance. Concept of Interval Estimation. | 12 | | | |
| 3 | Tests of Significance I | Concept of Statistical hypotheses- Type I and Type II error- Critical Region and power of the test. Neyman-Pearson lemma (Statement only). Large sample tests: Tests for single mean- equality of two means- single variance and equality of two variances for Normal population- Tests of single proportion and | 12 | | | |

| | | equality of two proportions. | |
|---|-----------------------------|--|----|
| 4 | Tests of Significance II | Sampling distributions of Chi-square- t and F statistics: derivation of Mean- variance- M.G.F and properties. Small sample tests: Tests for single mean- equality of two means- single variance and equality of two variance- Tests of proportions based on t and F statistics. ANOVA-test for equality several means. Chi-square tests for independence of attributes and goodness of fit. | 12 |
| 5 | Nonparametric Tests | Concept of Nonparametric tests- Run test for randomness- Sign test and Wilcoxon Signed Rank Test for one sample and paired samples. Run test- Median test and Mann-Whitney-Wilcoxon tests for two samples. Kruskal Wallis H test. | 12 |
| | | Total No. of Hrs | 60 |

| Course Out | Course Outcome | | | | |
|-------------|--|--|--|--|--|
| Students sh | ould able to | | | | |
| CO1 | Demonstrate the concepts of point and interval estimation and use point estimators | | | | |
| | for estimating unknown parameters. | | | | |
| CO2 | Use sampling distributions in testing of hypotheses. | | | | |
| CO3 | Apply various parametric and nonparametric tests for one sample and two samples | | | | |
| | and interpret their results. | | | | |

- 1 Knowledge of basic Software engineering methods and practices, and their appropriate application.
- 2 Understanding of software requirements and the SRS documents.
- **3** Understanding of software testing approaches such as unit testing and integration testing.
- 4 Describe software measurement and software risks.
- 5 Understanding on quality control and how to ensure good quality software.

| Course Content | | | | | | | |
|----------------|---|---|-----------|--|--|--|--|
| Unit No. | Module No. | Content | Ho urs | | | | |
| 1. | Introduction to Software Engineering: | Introduction to Software Engineering: The evolving role of software, changing nature of software, software myths. A Generic view of process : Software engineering- a layered technology, a process framework, the capability maturity model integration (CMMI), process patterns, process assessment, personal and team process models. Process models: The waterfall model, incremental process models, evolutionary process models, the unified process. | 12 | | | | |
| 2 | Software Requiremen ts: | Software Requirements: Functional and non-functional requirements, user requirements, system requirements, interface specification, the software requirements document. Requirements engineering process: Feasibility studies, requirements elicitation and analysis, requirements validation, requirements management. System models: Context models, behavioral models, data | 12 | | | | |

| | | models, object models, structured methods. | |
|---|---|--|----|
| 3 | Design Engineering: | Design Engineering: Design process and design quality, design concepts, the design model. Creating an architectural design: software architecture, data design, architectural styles and patterns, architectural design, conceptual model of UML, basic structural modeling, class diagrams, sequence diagrams, collaboration diagrams, use case diagrams, component diagrams. | 12 |
| 4 | Testing Strategies: | Testing Strategies: A strategic approach to software testing, test strategies for conventional software, black-box and white-box testing, validation testing, system testing, the art of debugging. Product metrics: Software quality, metrics for analysis model, metrics for design model, metrics for source code, metrics for testing, metrics for maintenance. | 12 |
| 5 | Metrics for Process and Products: | Metrics for Process and Products: Software measurement, metrics for software quality. Risk management: Reactive Vs proactive risk strategies, software risks, risk identification, risk projection, risk refinement, RMMM, RMMM plan. Quality Management: Quality concepts, software quality assurance, software reviews, formal technical reviews, statistical software quality assurance, software, software reliability, the ISO 9000 quality standards. | 12 |
| | | Total No. of Hrs | 60 |

Course Outcome

Students should able to

CO1: Explain Basic knowledge and understanding of the analysis and design of complex systems

CO2: Define software requirements and the SRS documents.

CO3: Identify software testing approaches such as unit testing and integration testing.

CO4: Describe software measurement and software risks.

CO5: Identify quality control measures and ensure good quality software.

| 1 | To understand the world of Artificial Intelligence and its applications through games, activities | | | | | | |
|---|---|--|--|--|--|--|--|
| | and multi-sensorial learning to become AI-Ready. | | | | | | |
| 2 | To introduce the learners to three domains of AI in an age appropriate manner. | | | | | | |
| 3 | To allow the learners to construct meaning of AI through interactive participation and | | | | | | |
| | engaging hands-on activities. | | | | | | |
| 4 | To introduce the learners to AI Project Cycle. | | | | | | |

5 To introducing the learners to programming skills - Basic python coding language.

List of Programs

- 1. Select a problem statement relevant to AI. Formulate the problem and give PEAS Description.
- 2. Implement simple PROLOG programs.
- 3. Implement any search strategy algorithm to reach goal state.
- 4. Write a Program to implement BFS/DFS search method.
- 5. Write a Program to implement informed A* search method.
- 6. Write a Program to implement Hill Climbing/Minimax search algorithm.
- 7. Construct a knowledge base and apply inference in FOL FC or BC or Resolution.
- 8. Implement decision tree for restaurant waiting problem.
- 9. Case study on AI applications.
- 10. Implement Mario problem with deep reinforcement learning.

| 1 To design basic framework. |
|------------------------------|
|------------------------------|

- **2** To implement different tags for designing front end.
- **3** To implement web development tools.

List of Programs

1. Write a program in HTML to display a message using basic tags, Heading tag and Paragraph tag. Use Line break and HR rule.

- **2.** A. Write a program in HTML using Unordered List tag.
- **3.** Write a program in HTML using Ordered List tag.
- **4.** Write a program in HTML using marquee tag and its attributes.
- **5.** Write a program in HTML using Image tag and its attributes.
- **6.** Write a program in HTML using Hyperlink tag (anchor tag). Show links to pages, text, Image.
- 7. Write a program in CSS to create a web page
- **8.** Write a program to perform the validation on email.
- 9. Design a web page for user interface application using PHP and MySQL

10. Design a mini project using HTML, CSS and JavaScript technologies in Web Development and write its report.

COURSE OBJECTIVE:

1 Be familiar with mathematical foundations of data mining tools.

2 Understand and implement classical models and algorithms in data warehouses and data mining

3 Characterize the kinds of patterns that can be discovered by association rule mining, classification and clustering.

4 Master data mining techniques in various applications like social, scientific and environmental context.

5 Develop skill in selecting the appropriate data mining algorithm for solving practical problems.

| Course Contents | | | | | | |
|-----------------|--------------------------------------|--|-------|--|--|--|
| Unit No. | Module No. | Content | Hours | | | |
| 1 | Introduction to data warehouse | Introduction, Definition, Components, Warehousing databases, Users, Advantages, Features, Data Granularity, Information Flow Mechanism, Metadata, Classes of Data, Lifecycle of Data, Data Flow. Architecture of Data Warehouse, characteristics, Goals, Data Marts, Building Data Marts, Pushing and Pulling Data. | | | | |
| 2 | Schema & Dimensional Modeling | Data Warehousing Schema, Dimensional Modeling, Star Schema, Snowflake Schema, Aggregate Tables, Fact Constellation Schema, Data Modeling, Dimensional Modeling: Dimension Table, Fact Tables, Fatless Fact Tables, Updates to Dimension Tables, other types of dimension table, Performance of Data Warehouse. ETL Process: Data Extraction, Data Transformation, Data Loading, Data Quality. | | | | |
| 3 | Data warehousing design Review | Data warehousing design Review, Developing data warehouse, Testing, Monitoring, Tuning, Feedback Loops. OLAP in Data warehouse: OLAP, ROLAP, HOLAP, Multidimensional Analysis, OLAP Functions, OLAP Application\s, OLAP Models, OLAP Considerations, Tools and Products, Data Design, Administration and Performance, | | | | |

| | | OLAP Platforms | |
|---|----------------|---|----|
| | | Introduction, Definitions, KDD Vs Data Mining, DBMA Vs Data Mining, | |
| | | Data Mining Problems, Data Models, OLAP, User Perspectives, Issues, | |
| | | Challenges, Trends, Application Areas and Applications Frequent | |
| | | Pattern Mining: Basic Problem Definition, Association Rule, Mining | |
| 4 | Data Mining | Association Rule, Applications, Variations, Interestingness, Methods | |
| | | of Discovering Association Rule, Priori Algorithm, Frequent Item set | |
| | | Mining (FIM) Algorithm, Comparison of FIM Algorithm, Optimal FIM | |
| | | Algorithm, Incremental Mining, Conciseness of Results, Sequential | |
| | | Rule. | |
| | | Classification, Definition, Applications, Evaluations of Classifiers, | |
| | | Issues, Classification Techniques, Optimal Classification Algorithm, | |
| 5 | Classification | Regression Decision Tree, Tree Construction Principal, Best Split, | 12 |
| | | Splitting Indices, Splitting Criteria, Decision Tree Construction | |
| | | Algorithm. | |

- **1** To implement file management with Hadoop
- 2 To create map-reduce program.
- **3** To apply database and tables in hive.
- **4** To apply pig scripts.
- **5** To analyse the implementation of Big data using R.

List of Programs

- 1. File Management tasks in Hadoop
 - a. Creation of Directory
 - b. Listing the contents of directory
 - c. Uploading and Downloading file in HDFS
 - d. Displaying contents of file
 - e. Copy file from source to destination
 - f. Move file from source to destination
 - g. Display last few lines of file
 - h. Display aggregate length of file
 - i. Remove Directory
- 2. Word count program using Map-Reduce
- 3. Weather Report POC-Map Reduce Program to analyse time-temperature statistics and generate report with max/min temperature
- 4. Implementing Matrix Multiplication with Hadoop Map Reduce
- 5. Implementation of Pig Latin scripts to sort, group, join your data
- 6. Implementation of pig Latin scripts for project, and filter your data.
- 7. Implementation of Databases in Hive
- 8. Implementation of Tables in Hive
- 9. Implementation of View in Hive
- 10. Implementation of Functions in Hive
- 11. Implementation of Index in Hive
- 12. Implementation of Big Data Analytics using R.

| Co | Course Outcomes- After completing the course, students will be able to | | | | | | |
|----|--|--|--|--|--|--|--|

Course Objectives

| 1 | Understand the mathematical and statistical prospectives of machine learning algorithms |
|---|---|
| | through python programming. |
| 2 | Design and evaluate the CNN models through python in built functions. |
| 3 | Evaluate the machine learning models pre-processed through various feature engineering |
| | algorithms by python programming. |
| 4 | Design and apply various reinforcement algorithms to solve real time complex problems. |
| 5 | Design and develop the code for recommender system using Natural Language processing. |

List of Programs

- 1. Learning XOR Problem
- 2. Building of a feed-forward Neural Network
- 3. Building Deep Learning Model
- 4. Building CNN Model for Image Classification
- 5. Building CNN Model for digit Identification
- 6. Building CNN Model for Face Mask Detection
- 7. Pre-processing of text (Tokenization, Filtration, Script Validation, Stop Word Removal, Stemming)
- 8. Morphological Analysis in NLP
- 9. N-Gram Model in NLP
- 10. POS Tagging
- 11. Chunking and Named Entity Recognition

12. Building Simple RNN model

- 13. Implementation of Autoencoder
- 14. Implementation of Deep CNN Autoencoder
- 15. Implementing Denoising Autoencoder
- 16. Implementing RBM Autoencoder

Course Outcomes

After completing the course, students will be able to

- **1** Understand the mathematical and statistical prospectives of machine learning algorithms through python programming.
- **2** Design and evaluate the CNN models through python in built functions.
- **3** Evaluate the machine learning models pre-processed through various feature engineering algorithms by python programming.
- 4 Design and apply various reinforcement algorithms to solve real time complex problems.
- **5** Design and develop the code for recommender system using Natural Language processing.

BSc. AI & DS: SEMESTER VI

| Course: AI in Cloud Computing | Course Code: BSDS601 |
|-------------------------------|----------------------|
| | |

Course Objectives

- **1** Describe architecture and underlying principles of cloud computing.
- 2 Explain need, types and tools of Virtualization for cloud
- **3** Describe Services Oriented Architecture and various types of cloud services
- 4 Understand the concept of AI in cloud computing
- 5 Understand the impact of AI in Cloud Computing

| Course Content | | | | | | | |
|----------------|---|--|-------|--|--|--|--|
| Unit No. | Module No. | Content | Hours | | | | |
| 1. | Introduction | Overview of Cloud Computing: Types of Cloud, Cyber infrastructure, Service Oriented Architecture Cloud Computing Components: Infrastructure, Storage, Platform, Application, Services, Clients, Cloud Computing Architecture. | 12 | | | | |
| 2 | Cloud Architecture, Services And Storage | Cloud Architecture, Services And Storage: Layered Cloud Architecture Design – NIST Cloud Computing Reference Architecture – Public, Private and Hybrid Clouds – laaS – PaaS – SaaS – Architectural Design Challenges – Cloud Storage – Storage-as-a-Service – Advantages of Cloud Storage – Cloud Storage Providers | 12 | | | | |
| 3 | Resource Management And Security In Cloud | Inter Cloud Resource Management – Resource Provisioning and Resource Provisioning Methods – Global Exchange of Cloud Resources – Security Overview – Cloud Security Challenges – Software-as-a-Service Security – Security Governance – Virtual Machine Security – IAM – Security Standards. | 12 | | | | |
| 4 | AI applications | Language Models – Information Retrieval- Information Extraction – Natural Language Processing – Machine Translation – Speech Recognition – Robot – Hardware – Perception – Planning – Moving | 12 | | | | |
| 5 | AI in cloud computing | Artificial Intelligence in Cloud Computing, How AI is Affecting Cloud Computing, Benefits of AI in Cloud Computing, Role of AI in Cloud Computing, Challenges in | 12 | | | | |

Course Objectives

| 1 | Explaining the key security requirements aligning with type of threats and vulnerabilities that attack the security of information or database systems. |
|---|--|
| 2 | Presenting symmetric and asymmetric cryptographic systems and covering most important parts of cryptology through introducing many cryptography techniques and algorithms. |
| 3 | Describing the most important advance encryption theories aligning with the number theories that necessary as requirements. |

- 4 Explaining the hash function as an application of cryptography aligning with the concept of message integrity and digital signature authentication.
- 5 Understand the issues involved in using asymmetric encryption to distribute symmetric keys.

| Course Contents | | | | | |
|-----------------|--------------|---|-------|--|--|
| Unit No. | Module No. | Content | Hours | | |
| 1 | Introduction | History of Cryptography. Mathematical background: Probability theory Information theory Complexity theory, Number theory. | 12 | | |

| - | | | |
|---|--|---|----|
| | | Symmetric (Private) Key Cryptographic Systems: Caesar Affine – Monoalphabetic Substitution Transposition Homophonic substitution – Vignere Beauford and DES Family – Product ciphers – Lucifer and DES. | |
| 2 | Symmetric (Public) Key Cryptographi c Systems | Classical Encryption Techniques (Substitution -1) Substitution -2 Transposition -1,Transposition -2 Block Ciphers, Data Encryption Standard Advance Encryption Standard (Structure) Transformation Function + Key Expansion Implementation of an example Multi Encryption – Triple DES Random bit generation and stream ciphering | 12 |
| 3 | Asymmetric (Public) Key Cryptographi c Systems: | Concept of PKCS, RSA Cryptosystem- Variants of RSA – Primality testing – Security of RSA – Merkle – Hellamn – Security of Merkle – Hellaman, ElGamal. Elliptical Curve Cryptography. Stream ciphers and block ciphers: The one time pad – Synchronous stream ciphers – Self- synchronizing stream ciphers Feedback shift registers – Linear Complexity – Non-linear feedback shift registers Stream ciphers based LFSRs. Non-linear Combination generators Non linear filter generators Clock controlled generators The alternating step generators The shrinking generators | 12 |
| 4 | Digital Signatures | Properties, Generic signature schemes Rabin Lamport Matyasmeyer, RSA – Multiple RSA and ElGamal Signatures – Digital signature standard – Blind Signatures- RSA Blind. Secret Sharing Algorithms: Threshold secret sharing – Shamir scheme, Blakley scheme and modular Scheme. Pseudo random number generators: Definition of randomness and pseudo-randomness Statistical tests of randomness Linear congruential generator Modern PRNGs (a brief description). | 12 |
| 5 | Cryptograph y | Cryptography Data Integrity: Hash Function Two Simple Hash Function Secure Hash Algorithm (SHA-3) Message Authentication Codes | 12 |
| | | Total No. of Hrs | 60 |

| Course Outcom | e |
|-----------------|--|
| Students should | able to |
| CO1 | Presenting the most important key security requirements that required for any security systems generally and specifically. |
| CO2 | Utilizing and code developing for encryption algorithms that required to achieve confidentiality key security. |
| CO3 | Building an appropriate encrypting system that designed for specific key size and message length. |
| CO4 | Investigating the suitability of a hash function for verifying the message integrity and digital signature authentication. |
| CO5 | Appreciate the role of distributed symmetric key in improving the asymmetric encryption systems. |

| SAQ 2) | | |
| SAQ 3) | | |

SAQ 4) SAQ 5) SAQ 6)

Q.4. LONG ANSWER QUESTION: Solve any 2 out of 4

(10 Marks x 2 = 20

Marks) LAQ 1) LAQ 2) LAQ 3)

LAQ 4)

Letter Grades and Grade Points (GP) Based on the aggregate of marks obtained through internal assessment and external assessment, each student is awarded a final letter grade at the end of the semester, in each Course. The letter grades and the corresponding grade points, as recommended by UGC, are asfollows:

| Letter Grade | Grade Points | Normalized Mark Range |
|-----------------|-----------------|--|
| O (Outstanding) | 10 | 91-100 |
| A+ (Excellent) | 9 | 81-90 |
| A (Very Good) | 8 | 71-80 |
| B+ (Good) | 7 | 61-70 |
| B(Above | 6 | 56-60 |
| Average) | | |
| C (Average) | 5 | 50-55 |
| F (Fail) | 0 | <50 Failure due to insufficient marks in |
| | | the course |
| Ab(Absent) | 0 | Failure due to non-appearance in |
| | | examination |
| I (Incomplete) | 0 | Failure due toinsufficient |
| | | attendance in thecourse. |
